All protective vaults available in the color of your choice

In most areas of the country, no state or local law requires you to buy a container to surround the casket in the grave. However, many cemeteries require that you have such a container so that the grave will not sink. Either a burial vault or a grave liner will satisfy these requirements if allowed by the cemetery.

FLAT

Due to cemetery restrictions, the flat marker has become the most popular grave memorial selection. Flat memorials sit flush with the ground and, depending upon how they are set, can have vases incorporated into them. Each flat marker can be customized through border designs, frosting, font selection and other techniques.

BEVEL

Beveled markers look similar to flat markers. The difference is that they are 6" in thickness at the back of the stone sloping to 4" in thickness in the front. Bevels are cut to be installed above ground and sometimes are accompanied with a granite base. Some cemeteries prohibit the placement of this type of memorial.
